HUMAN-INDUCED CLIMATE CHANGE: FACT OR FICTION?

A Geoscientist’s View

Dr Geoff Derrick
Section 4

The nature of CO$_2$
This CO$_2$ molecule is your friend

- Odourless
- Tasteless
- Colourless
- Harmless
Carbon is the building block for all life on earth, so it is irrational & ignorant to call it a pollutant !!
CO$_2$ is sequestered into great forests like the kauri groves of Margaret River, WA
And the planet is greening as a result...
Shush now comrades; did you know I have 40,000 ppm of CO₂ in my breath?

I didn’t hear her say that, but I support everything she said . . .
Carbon dioxide ‘FOG’ is in fact water vapour
Submariners work in levels to 5000ppm CO₂
