

## Who are the Energy Fools?

They are the fools who thought Germany could run its industry on wind and solar energy (they found they needed nuclear from France, gas from Russia and hydro from Scandinavia.)

The same fools thought wind and solar could cope with a polar vortex on the Great Plains.

And they think that with mirrors, windmills, batteries, transmission lines, electric vehicles and hydrogen bubbles, Australia can reach Net Zero without destroying our basic industries.

**Nothing can survive ridicule so let's start the laughter and ridicule.**

Can you help by Posting this ditty anywhere and passing it on to friends, opinion leaders, media contacts or post on any media. And write some yourself.

We are in a desperate battle for public opinion.

This is just another sneaky shot with a daisy air rifle.

## **Waiting for Wind** by Viv Forbes

Australia's elected appeasers  
Push mad energy plans, just as teasers.  
But while coal powers Asians  
And nukes help Caucasians  
Dumb Aussies sit praying for breezes!
